

DRIVE DOWN GROUNDING COSTS

Electrical wholesalers and contractors have counted on Galvan for quality grounding products at reasonable prices for more than 30 years. During that time, we've also built a reputation for being easy to do business with, unlike some of our competitors. Today, we're the only American manufacturer with total in-house production of copper clad, stainless steel and hot dip galvanized ground rods, including new ANSI-approved NEMA GR-1 galvanized rods.

Knock grounding costs down to size. Make the move to Galvan for ground rods, accessories and connecting products. We're driven to be your #1 source.
