

Sell The Safer System

Use only Galvan's complete system of **UL-Listed Gold Series™** galvanized ground rods, copper coated ground rods, clamps and couplings. Substitute any listed component with a non-listed component and the entire system is no longer code compliant. The simple way to a safe system is plain to see. Use only Galvan UL-Listed components, built to last 40 years or more in most soil conditions. Call about carrying the complete Galvan Safer System today.
